

YUSRA IMRAN

IT Student | SOC Analyst

yusraimran1435@gmail.com | Punjab, Pakistan | github.com/yusra2801 | linkedin.com/in/yusra-imran-6a9b6640a
Portfolio: yusra-portfolio-one.vercel.app

SUMMARY

Cybersecurity-focused IT student working towards a SOC Analyst role. Hands-on experience through cybersecurity internships, TryHackMe labs and SOC labs in Splunk, phishing analysis and threat intelligence. Detail-oriented and eager to grow in security.

TECHNICAL SKILLS

Python (Security Scripting), Splunk (SPL, Dashboards & Alerts), Log Analysis (SIEM), Phishing Email Analysis, Threat Intelligence (AbuseIPDB, VirusTotal), MITRE ATT&CK & Cyber Kill Chain, Networking Fundamentals, Nmap, Metasploit (Basics), Linux & Windows Fundamentals, DNS & Cryptography Basics, OWASP ZAP, OSINT Tools, Git & GitHub, MS Word, MS Excel, MS PowerPoint

EXPERIENCE / INTERNSHIPS

SOC Analyst Intern — TechBiz Academy

In Progress

- Built a SOC Monitoring Dashboard in Splunk (2 panels) and a High Failed Login Alert (threshold above 5) that triggered as tested.
- Ingested a sample authentication log (20 events) into Splunk and used SPL searches with a time-range filter to isolate and count 12 failed logins.
- Analysed a phishing email sample (spoofed sender, mismatched hyperlink, tracking pixel), scanned the URL on VirusTotal and reached a Phishing verdict with 8 red flags.
- Investigated a suspicious IP on AbuseIPDB and a file hash on VirusTotal, telling a real threat apart from a harmless EICAR test file.
- Mapped MITRE ATT&CK T1110 (Brute Force) onto the 7 Cyber Kill Chain stages; studied log types and baselining to spot anomalies.
- Lab reports: yusra-portfolio-one.vercel.app (SOC Labs section)

Cybersecurity Intern — CodeAlpha

Aug 10 - Sep 10, 2026 | Completed | Credential ID: CA/DF1/241209

- Built a network sniffer using Python (scapy) to capture and analyze live IP/protocol traffic.
- Developed a phishing awareness training module including a 9-slide presentation and an interactive HTML quiz.
- Built a simplified Python-based Intrusion Detection System (IDS) to detect port scans and access attempts on high-risk ports.
- Delivered all tasks in a consolidated GitHub repository with dedicated READMEs for each completed task.
- Certificate: [View Certificate](#) | Letter of Recommendation: [View LOR](#)

Cybersecurity Intern — Sqrock IT Solution

Aug 12 - Sep 12, 2026 | Completed

- Completed a 30-day, two-phase Python security internship: Social Engineering Attack Simulations (Phase 1) and Web Application Security & Defensive Automation (Phase 2).
- Built Python tools including an OSINT scanner, phishing URL scorer, honeypot server, ML phishing classifier (Naive Bayes, 93.33% accuracy on a 50-email dataset), SIEM log parser and incident-response automation script.
- Published all daily work (scripts, READMEs, screenshots) on GitHub: github.com/yusra2801/Sqrock-IT_Cybersecurity

LEARNING & DEVELOPMENT

TryHackMe

Top 20% rank, 33 rooms completed, 7 badges — key rooms: Introduction to SIEM, Phishing Emails in Action, Threat Intelligence Tools, Intro to Cyber Threat Intel, Investigating Windows, Cyber Kill Chain, Intro to Logs, Security Principles, DNS in Detail, Common Attacks, Pentesting Fundamentals

Cisco Networking Academy

Introduction to Cybersecurity - Completed, Jul 2026 - [View Certificate](#)

Google Career Certificates

Foundations of Cybersecurity (Google, via Coursera) - Completed, Sep 2026, 92.79% - [Verify](#)

Play It Safe: Manage Security Risks (Google, via Coursera) - Completed, Sep 2026, 94.80% - [Verify](#)

EDUCATION

University of the Punjab

2024 - 2026

ADP Information Technology - Papers Completed, Result Awaited

Intermediate (Pre-Engineering)

Grade: B

Matriculation

Grade: A
